For: VALVE TO MYOCARDIUM )  
TENSION MEMBERS DEVICE )  
AND METHOD )

Assistant Commissioner for Patents  
Washington, DC 20231

Sir:

**SUPPLEMENTAL PRELIMINARY AMENDMENT**

Prior to the examination of the above application, please amend this application  
as follows:

**IN THE SPECIFICATION:**

Please amend the specification, as follows:

on page 2, please replace the first full paragraph, lines 6-12, with the following  
new paragraph:

-- It has been argued that valve repair is preferable to valve replacement if  
the leaflet-chordae-papillary connections can be maintained. Heart wall stress will  
increase if the chordae are cut during valve replacement. It has been shown that by  
severing the chordae there can be 30 percent (30%) reduction in chamber function.  
Mitral valve replacement has high mortality in very sick, chronic heart failure patients--
